NILEBRIDGE PROFESSIONAL ACADEMY

Digital Marketing & Campaign Analytics

DEMONSTRATION CATALOGUE · 2026–2027 · CATALOGUE CODE MK

CATALOGUE OVERVIEW

A practical catalogue spanning marketing planning, social content operations, and campaign analytics. Learners create structured campaign artifacts, define metrics before measurement, and interpret performance without overstating what the data proves.

ACADEMY AND DATA NOTICE

NILEBRIDGE PROFESSIONAL ACADEMY is a fictional demonstration institution. All programme records, durations, curriculum details, assessments, and career descriptions are synthetic examples created for RAG ingestion and retrieval testing. They are not real academy offerings, verified schedules, official accreditation claims, or employment guarantees.

Programme Directory

The programme records below use stable programme identifiers to support retrieval and metadata validation.

Programme ID	Programme title	Level	Duration
MK-STR-101	Digital Marketing Strategy & Planning	Foundation	50 guided learning hours
MK-ANA-301	Marketing Analytics & Campaign Optimization	Intermediate	70 guided learning hours

Information included for each programme

- Programme identity, level, duration, delivery format, and intended audience
- Entry requirements and programme purpose
- Learning outcomes and week-by-week curriculum
- Practical labs, assessment weights, and grading criteria
- Capstone brief, deliverables, tools, and FAQ
- Provenance and accreditation status

PROGRAMME 01 · MK-STR-101

Digital Marketing Strategy & Planning

Indicative hours	Duration	Level	Delivery
50 guided learning hours	6 weeks	Foundation	Workshops, case exercises, and campaign-plan review.

Programme summary

Connects business objectives to audience research, positioning, channel selection, campaign planning, and a measurable review process.

Intended audience

Beginners, students, and small-business teams.

Entry requirements

No previous marketing role required; basic writing skills are helpful.

Learning outcomes

- Write a campaign objective connected to a defined business need.
- Describe a target audience and a value proposition.
- Map channels to customer-journey stages and content purposes.
- Define KPIs, time windows, and reporting responsibilities.
- Document budget assumptions, risks, and privacy considerations.

Week-by-week curriculum

Week	Topic	Coverage	Practice / evidence
1	Business objectives	Distinguish business goals from marketing activities and output metrics.	Write an objective statement.
2	Audience and positioning	Identify audience needs, barriers, and message differentiation.	Create an audience and positioning brief.
3	Customer journey	Map discovery, consideration, conversion, and retention touchpoints.	Create a journey map.
4	Channel planning	Compare search, social, email, and content channel roles.	Build a channel plan.
5	Budget and measurement	Document budget assumptions and define KPIs with calculations.	Create a measurement sheet.
6	Campaign presentation	Combine audience, message, channel, KPI, and risk choices.	Present a campaign brief.

Practical labs

- Objective writing
- Audience segmentation
- Channel-fit comparison
- KPI definition

Assessment structure

Component	Weight	Evidence / criteria
Planning exercises	25%	Clear objectives and audience rationale.
Channel plan	25%	Alignment between audience, message, and channel.
Final campaign brief	50%	Measurement plan, assumptions, risk awareness, and presentation.

Capstone project

Prepare a campaign plan including audience, value proposition, channel rationale, sample message, budget assumptions, KPI definitions, review cadence, and risk notes.

Suggested grading rubric

- Objective and audience: 25%
- Channel and message alignment: 25%
- Measurement plan: 25%
- Clarity and risk awareness: 25%

Tools and technologies

Spreadsheet software · presentation tools · campaign-planning templates · analytics concepts

Frequently asked questions

Does a high number of impressions guarantee sales?

No. Impressions measure exposure, not necessarily intent, conversion, or revenue.

Why define KPIs before launch?

Predefined metrics reduce ambiguity and make later comparisons more consistent.

Are the budget values in this sample real?

No. Any budget used in exercises is illustrative and must be labeled as such.

PROGRAMME 02 · MK-ANA-301

Marketing Analytics & Campaign Optimization

Indicative hours	Duration	Level	Delivery
70 guided learning hours	8 weeks	Intermediate	Data-led labs, dashboard review, and experiment planning.

Programme summary

Builds reliable reporting practices, from metric definitions and tracking checks to funnel analysis, dashboard storytelling, and controlled optimization experiments.

Intended audience

Marketers and junior analysts familiar with campaign concepts and spreadsheets.

Entry requirements

Basic spreadsheet skills and familiarity with common marketing metrics.

Learning outcomes

- Define marketing metrics with explicit numerator, denominator, and scope.
- Check campaign datasets for missing tracking, duplicates, and inconsistent naming.
- Analyze funnel movement and compare channels with stated caveats.
- Create a dashboard that communicates context and limitations.
- Propose a testable experiment with a success metric and guardrails.

Week-by-week curriculum

Week	Topic	Coverage	Practice / evidence
1	Metric dictionary	Define reach, impressions, clicks, CTR, conversions, conversion rate, and CPA.	Create a metric dictionary.
2	Campaign tracking	Use campaign naming and UTM concepts consistently.	Audit sample campaign tags.
3	Data validation	Check duplicate events, missing fields, dates, and inconsistent labels.	Write a data-quality report.
4	Funnel analysis	Calculate stage conversion and identify where additional evidence is needed.	Create a funnel summary.
5	Dashboard design	Choose visuals and provide clear labels, units, and date ranges.	Build a campaign dashboard.
6	Channel comparison	Compare results while noting spend, audience, and attribution limitations.	Write a comparison note.
7	Experiment design	Form a hypothesis, define success criteria, and consider sample size and confounders.	Create an experiment brief.
8	Capstone review	Present validated metrics, findings, and prioritized next steps.	Submit report and dashboard.

Practical labs

- CTR and conversion calculations
- UTM naming audit
- Funnel analysis
- Experiment hypothesis writing

Assessment structure

Component	Weight	Evidence / criteria
Metric and data checks	25%	Correct definitions and validation.
Dashboard	25%	Readable presentation and appropriate context.
Capstone	50%	Analysis quality, limitations, and actionable experiment design.

Capstone project

Analyze a supplied synthetic campaign dataset, document metric definitions, validate tracking quality, build a dashboard, and propose one experiment without claiming causality unsupported by the data.

Suggested grading rubric

- Metric correctness: 25%
- Data validation: 20%
- Interpretation and caveats: 25%
- Experiment quality: 30%

Tools and technologies

Spreadsheet software · analytics dashboards · visualization tools · UTM conventions · optional SQL

Frequently asked questions

What is CTR?

Click-through rate is commonly calculated as clicks divided by impressions, multiplied by 100; the reporting definition should state its scope.

Does correlation prove a campaign caused sales?

No. Other changes and confounding factors may explain observed differences.

What should a report do when tracking is incomplete?

State the gap, explain how it limits interpretation, and avoid presenting unsupported precision.
